

PERIPHERAL NERVE STIMULATION

EXCEL
PAIN AND SPINE

Advanced Therapy. Targeted Relief.

The Peripheral Nerve Stimulation (PNS) is a non-invasive therapy that uses high-frequency electromagnetic energy to stimulate peripheral nerves, reduce pain, and promote healing.

TARGETED PAIN RELIEF

Direct stimulation of affected peripheral nerves.

NON-INVASIVE & DRUG-FREE

No surgery, no needles, no medications.

IMPROVES FUNCTION

Helps restore mobility and improve quality of life.

SAFE & WELL TOLERATED

Minimal side effects and no downtime.

COMMON CONDITIONS TREATED
